 Rawalpindi, Pakistan

 [LinkedIn](#)

Seasoned Software Engineer with over 5 years of expertise in JavaScript, React Native, ReactJS, Redux, NodeJS, and TypeScript. Proficient in building robust mobile applications using React Native, with a strong background in web technologies such as HTML5, CSS3, MongoDB, Firebase, and MySQL. Skilled in using Maestro for mobile UI testing and Jest for testing, committed to delivering high-quality, scalable solutions. Demonstrated expertise in mobile app development, responsive design, and database management, with a focus on efficient, scalable, and secure software solutions. Seeking to leverage my technical skills and experience in mobile application development to contribute to innovative projects in a dynamic and collaborative environment.

Experience

- 31 Green/Wahed Invest (Remote) | Frontend Engineer

Oct 2022 – Present

 - Collaborated with stakeholders to gather requirements and create technical specifications, leading to a successful feature launch that increased user engagement by 25%
 - Designed scalable frontend architectures using React Native, resulting in improved application performance and a more intuitive user experience.
 - Developed detailed technical specifications and led reviews with cross-functional teams, ensuring alignment with project goals and achieving a significant reduction in development cycle time.
 - Performed code audits and optimizations, decreasing application load times and improving overall performance.
 - Improved responsive mobile applications using modern frontend technologies, achieving 95% test coverage and reducing production bugs.
 - Led application deployments through CI/CD pipelines and provided ongoing support, including bug fixes and performance enhancements, leading to a 40% decrease in production issues.
- Jovi Technologies - Islamabad | Software Engineer (React Native)

Sep 2021 – Jul 2022

 - Crafted high-quality mobile applications using React Native, enhancing user engagement.
 - Boosted user engagement by 15% by leading the development of a key mobile app feature.
 - Regularly conducted code reviews, ensuring adherence to best practices and reducing bugs.
 - Accelerated project delivery by 20% by streamlining the software development lifecycle.
 - Specialized in performance optimization, effectively reducing app load times.
- iOPTIME - Islamabad | Software Engineer (React Native)

Dec 2019 – Aug 2021

 - Spearheaded the development of crucial app features, increasing user retention.
 - Generated scalable React Native components, reducing development time.
 - Identified and fixed critical bugs, leading to a 40% decrease in user-reported issues.
 - Integrated new technologies and third-party services, improving app functionality and increasing user satisfaction.
 - Collaborated with cross-functional teams to deliver scalable React Native components, significantly reducing development time.
- QTSH - Rawalpindi | Software Engineer (React Native)

Dec 2019 – Aug 2021

 - Built and deployed iOS applications using React Native, substantially boosting user engagement.
 - Integrated new technologies, enhancing app performance and usability.
 - Planned advanced features, resulting in higher retention rates.
 - Improved app load times through thorough code audits and optimization.
 - Collaborated with design, backend, and QA teams, accelerating development timelines.

Education

- BIIT – Rawalpindi

2015 - 2019

 - BSCS
- F. G Degree College

2013 - 2015

 - F.Sc Pre-Engineering

Skills

- **Programming Languages:** JavaScript, TypeScript, React Native, ReactJS, NodeJS
- **Databases Management:** MongoDB, SQLite, Firebase, MySQL
- **Development Tools:** Android Studio, VS Code, Git, Teams, Bitbucket, GitLab
- **Bug Tracking and Project Management:** Jira, Trello, Azure DevOps, Maestro
- **Technologies/Architecture:** React Redux, MVC, MVP, MVVM, REST APIs, GraphQL, JSON, React Relay
- **CI/CD:** GitHub workflow, Bitrise

Projects

Wahed Invest

- Developed an investment app, increasing user engagement.

Theo Health

- Enhanced user experience by implementing a robust health monitoring feature.

RoundTrip Health

- Streamlined patient appointment scheduling, improving overall efficiency.

iGrapple

- Improved user retention through the development of a dynamic grappling feature.

Vox Market

- Increased platform reliability by engineering a scalable market data system.

Lawyerup

- Boosted accessibility with an intuitive legal document management system.

DD26 Color Controller

- Created an iOS app for LED light control, enhancing user convenience.

E-UHD

- Built a university portal, improving student access and satisfaction.

JOVI

- Built a digital shopping app, boosting user retention.

Satori Group Reporting

- Spearheaded a reporting tool, improving report generation efficiency by 30%.

Elearning

- customized a digital textbook repository, significantly expanding resources.

Ananas Shopping List

- Established a digital textbook repository, significantly expanding resources.

Medical Missionary

- Built a communication app, improving client-doctor interaction.

C & R Preferred Concrete Pumping

- Developed a check-in/check-out management system, reducing errors.

AiEye

- Crafted a home inspection report app, enhancing the inspection process.

BLE Distance Estimator

- Engineered a BLE app for RSSI notifications, increasing app reliability

Order Checkout

- Launched a restaurant delivery platform, growing restaurant sign-ups.

Managers Report

- Innovated a real estate management app, increasing user efficiency.

EMCAST

- Established a learning platform, expanding educational opportunities.

ISP Management

- Built a user and fee management system, streamlining operations.

Vlrigo

- Implemented Salesforce community setup, increasing community engagement.

Laundry

Cosmetic Service Provider

Handyman

Competencies

- Frontend and backend development, creating effective and efficient web applications.
- Developing responsive web designs using HTML5, CSS3, and JavaScript frameworks for optimal user experience.
- Designing, managing, and optimizing databases (e.g., MySQL, MongoDB) for robust data solutions.
- Integrating RESTful APIs and third-party services to enhance application functionality.
- Optimizing code for performance, debugging, and maintaining code quality and security.
